Education

Ch. Devi Lal State Institute of Technology

Sep 2023 – July 2027

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.1/10

Sirsa, Haryana

Technical Skills

Languages: Java, Python, JavaScript (ES6+), C++, SQL, HTML5, CSS3/SCSS

Frontend: React.js, Three.js, SCSS, Responsive Design, Material UI

Mobile: Android SDK, Android Studio, Volley, SQLite, GPS & Sensor APIs

Backend / APIs: RESTful APIs, JWT Authentication, JSON, MySQL, SQLite

Tools & Concepts: Git, GitHub, Agile/SDLC, OOP, DBMS, Unit Testing

Experience

Aptech Computer Education

June 2025 – Sep 2025

Technical Trainee – Android & Java Development

Fatehabad, Haryana

- Built **8+ production-ready Android applications** using Java and Android SDK across full **SDLC** and Agile sprints, achieving 95% code quality benchmarks.
- Improved data retrieval performance by **40%** through RESTful API integration via Volley and SQLite indexing strategies.
- Boosted team productivity by **25%** using Git/GitHub version control, peer code reviews, and technical documentation practices.

Independent Software Development

May 2023 – Present

Self-Directed Full-Stack & Android Developer

Remote

- Engineered **12+ Android and web applications** incorporating secure authentication, role-based access control, and real-time database synchronization.
- Built responsive web interfaces using **React.js, Three.js, HTML5, and SCSS** with a focus on performance, cross-browser compatibility, and clean UI design.
- Practiced consistent code versioning with **Git/GitHub**, maintaining structured project documentation across all personal and academic projects.

Projects

NexDash – Productivity Dashboard | *React.js, Three.js, SCSS, REST APIs, JavaScript*

Jan 2026 – Mar 2026

- Built a feature-rich productivity dashboard using **React.js** with modular component architecture, real-time task tracking, and analytics views, reducing manual workflow management by **45%**.
- Integrated **Three.js** for interactive 3D data visualizations, delivering engaging performance charts and activity heatmaps on top of a RESTful API backend.
- Designed a complete **SCSS-based design system** with reusable components, dark mode toggle, and fully responsive layouts, achieving a 98/100 Lighthouse performance score.

StaffShifter – Enterprise Attendance System | *Java, Android, MySQL, REST APIs, JWT*

Oct 2025 – Dec 2025

- Engineered a scalable attendance and scheduling system reducing administrative workload by **65%** through intelligent substitute assignment and **JWT-based** authentication.
- Optimized database design with normalized **DBMS** schema, supporting **100+ concurrent users** with 99.9% uptime and $O(\log n)$ search complexity.
- Delivered a Material Design UI with RecyclerView and dynamic filtering, improving data accessibility scores by **50%**.

ShakeySafe – IoT Personal Safety Application | *Java, Android Sensors, GPS, SMS*

Dec 2025

- Built an accelerometer-based security app achieving **92% threat detection accuracy**, triggering automated GPS and SMS alerts in **under 2 seconds**.
- Reduced battery consumption by **50%** by optimizing sensor polling intervals and implementing adaptive caching for background monitoring.

Achievements & Certifications

Core Java & Android Development: Certified by Aptech – 400+ hours of professional training in Java, Android SDK, and mobile architecture.

UI Development: Built 5+ React.js and Three.js projects with custom SCSS design systems, responsive layouts, and cross-browser compatibility.

Cloud & Web Fundamentals: Completed training in cloud infrastructure basics, RESTful API design, and web application deployment practices.
